Experience

Delta6Labs Fintech Private Limited

2 years 6 months

Delivery Manager

April 2025 - Present (1 year 6 months)
Noida

- Lead & manage cross-functional teams to integrate blockchain technology into the exchange platform, improving transaction security, transparency, and efficiency.
- Continuously optimize delivery processes and monitor project performance against KPIs and SLAs, reporting on progress, milestones, and deviations to management.
- Manage and deliver internal projects, ensuring timely, quality delivery while meeting security, scalability, and performance standards for the crypto exchange platform.
- Identify and mitigate potential risks early, ensuring minimal disruption to operations, user experience, and project timelines.
- Ensure clear communication and alignment with internal stakeholders and external partners, providing regular updates and managing expectations throughout the project lifecycle.

- Manage and mentor a team of Project Managers, ensuring consistent delivery and alignment across all projects

Project Manager (PMO)
April 2024 - April 2025 (1 year 1 month)

Delta6Labs is the organisation where finance meets the power of blockchain technology. We're pioneering a new era of financial empowerment through secure, transparent, and decentralised solutions. We revolutionise investing, and transactions, putting control back into the hands of the people. With cutting-edge crypto technologies and a commitment to innovation, we're shaping a world where financial freedom is accessible to all.

- Managing Internal Products and Projects for Delta6Labs
- Overseeing the development, enhancement, and maintenance of the crypto exchange platform, ensuring it meets security, scalability, and performance standards.
- Leading projects to integrate blockchain technology into the exchange platform for enhanced security, transparency, and efficiency of transactions.
- Identifying potential risks associated with IT projects and implementing mitigation strategies to minimize their impact on operations and user experience.
- Building and managing a skilled team of IT professionals, including developers, QA's, Designers and DevOps experts, to effectively execute projects and achieve organizational goals.
- Facilitating clear and timely communication with internal stakeholders, such as management, cross-functional teams, and external partners, to ensure alignment and transparency throughout project lifecycles.
- Monitoring the performance of IT projects against predefined KPIs and SLAs, and providing regular reports to management on project status, milestones achieved, and any deviations from the plan.

VLink Inc
